Este aviso contiene información importante que puede afectarle personalmente. Pídale a alguien que se lo traduzca.

Metro Vancouver, working in cooperation with the District of Maple Ridge and the City of Pitt Meadows, is undertaking major water utility infrastructure projects, called The Ridge Water Utility Projects. These projects consist of a new water main along Telep Avenue and 203rd Street, a pump station and a series of water mains that will connect the new pump station to the existing water distribution system. When complete, these projects will help meet the growing water demands for Maple Ridge, Surrey and Langley.

The Ridge Water Utility Projects – pump station and directly connected mains

Upcoming open house

Metro Vancouver will be holding an open house in late February 2012. Once the details are confirmed, residents and businesses will be notified.

Upcoming construction activities

Starting the week of January 23, 2012, Metro Vancouver's contractor, will be installing a new water main along 120A Avenue and 201B Street. Water main installation is expected to take approximately three weeks to complete. This work will include a large trench excavation, pipe installation, pipe welding and backfilling.

As installation progresses, the affected areas will be backfilled and temporarily restored. Final restoration for this section of work is scheduled for April 2012 when weather conditions permit.

Continued on reverse ...

Upcoming construction activities continued...

Construction signage and flag personnel will be on site to direct traffic; however, please allow for extra travel time or plan an alternate route to avoid delays.

Please note that in late 2013 crews will return to Dewdney Trunk Road and 201B Street to connect this new water main to Metro Vancouver's existing water distribution system.

Access

Access to driveways will be limited while construction activities occur in front of a given address. Such impacts typically last a few hours with notice provided at least 24-hours in advance. There are certain areas that will experience longer driveway closures. Staff will contact those residents in advance to discuss the extent of the closure.

Traffic and parking

Access for local traffic will be maintained throughout construction; however, 120A Avenue and 201B Street construction areas will be closed to all other traffic. Residents are asked to use designated detour routes, which will be clearly marked by signage. Flag personnel will also be on site to direct vehicle and pedestrian traffic. Street parking near the construction sites will be temporarily unavailable.

Noise and dust

There will be construction noise associated with this project, due to machinery and large trucks working next to the roadway. All work will comply with municipal noise bylaws, and granted bylaw variances. Noise mitigation measures will be put in place whenever possible.

There will be dust associated with this project. Metro Vancouver's contractor will conduct street watering as required to reduce dust and dirt on local roads. Trucks hauling materials to and from the construction site will be covered.

Safety and security

During construction heavy equipment such as excavators and trucks delivering pipe and removing excavated material will be on site. Trucks will travel on designated truck routes and will use mandatory safety precautions such as back-up beepers. The construction site will be fenced off after-hours for safety purposes. Metro Vancouver will work with the contractor to ensure safe pedestrian access around active construction zones. Please use caution when in the area.

Metro Vancouver thanks you for your patience during construction of The Ridge Water Utility Projects.

Hours of work

- Construction work will generally occur between 7 a.m. and 6 p.m. from Monday to Friday.
- There may be occasions when the contractor needs to work later, or on a Saturday or Sunday, to complete a specific task and maintain the construction schedule.
