

Schedule C Street Tree Installation Review

*To be completed by a Landscape Architect, Certified Arborist or
Landscape Technician*

Development Name/File #: _____

Address: _____

Note: A copy of the original Street Tree Plan or similar plan MUST accompany this document.

On the plan will be noted the "AS PLANTED" list of street trees as they exist on the day of inspection. **The plan must indicate the number of trees, the location of each, the Genus, species and variety of each, the size and condition.** Any additional notes can also be made on the drawing.

All of the above trees have been inspected individually, and the following has been checked: (initial or check by each, as appropriate)

1. Trees planted at proper depth: ____
2. String/wire around base of trees has been removed: ____
3. No basket, burlap or other material from root ball is exposed: ____
4. Trees are staked with two wooden stakes and tied with proper tree tie: ____
5. Trees are free of visible signs of disease or insect damage: ____
6. Trees are of good structure: ____
7. Base of trees has been mulched no thicker than 2 inches: ____
8. Excess rock, soil and debris has been removed from base: ____
9. Tree wrap, string and such have been removed from tree: ____

Any other comments relating to the installation of these trees:
