MEMORIALIZATION

No person will place a memorial marker or Niche plate on any Grave or Niche until the applicable fee shown in Schedule “A” has been paid to the Treasurer, which includes a contribution to the Care Fund in respect to each memorial. Memorial Markers and Niche plates will only be installed by the Caretaker.

All monuments, markers, plaques and niches will only be installed after the human remains or Cremated Remains have been interred and may only be installed on the corresponding Grave or Niche where the deceased is interred.

An application for monuments, markers, plaques and Niche plate installations may only be made by the Rights Holder, his executor(s) or executrix, or his heirs.

Existing monuments, markers and Niche plates may be replaced or refurbished with a duplicate of the original providing it includes similar dimensions and wording, or conforms to specifications in Cemetery Bylaw Section 11.

All memorials may be installed provided they conform to the following:

All tablet-type memorials must be made of stone or bronze.

Each memorial tablet will be installed in a position on the Grave according to that established by the City for memorials on Graves in the Cemetery. Requests for exception based on religious beliefs will be made to the Clerk, which may not be unreasonably denied. Each memorial tablet will have its top surface set level with the surface of the surrounding ground.

Each bronze memorial tablet will be attached to a base not less than 3 inches (7.5 cm) thick with side surfaces true and perpendicular with the top surface of the attached tablet. A bronze memorial tablet on the Grave of a full adult burial or Child may be smaller than its base provided the base conforms to the size for the Grave as required by Cemetery Bylaw Section 11, Subsections (b), (c) and (d), and provided the part of the base extending beyond the tablet does not exceed 2 inches (5.08 cm) wide and has a smooth, slightly bevelled surface to shed water at its outer edges.

Each stone memorial tablet will be not less than 2 inches (5.08 cm) thick and will have its side surfaces true and perpendicular with its top surface.

A memorial marker or Niche plate may be inscribed in a non-English script provided the Clerk has been provided with a written interpretation.
